VITÓRIA PEÇANHA

Data Engineer | Analytics Engineer | Head of Technology & Innovation

Rio das Ostras, RJ | +55 22 99847-0738 | vitoriapecanha.log@gmail.com | linkedin.com/in/vitoria-pecanha | github.com/vitoriape

PROFESSIONAL PROFILE

Certified Data Engineer and DBA with 5+ years of experience in data engineering, analytics engineering, business intelligence, automation, and systems integration. Experienced in building ETL/ELT pipelines, APIs, data architectures, SQL databases, executive dashboards, CRMs, chatbots, and automated workflows. Combines technology leadership, analytical thinking, and business acumen to deliver reliable data, governance, operational efficiency, and cost reduction.

TECHNICAL SKILLS

- Data & Engineering: Python, SQL, MongoDB, PySpark, ETL/ELT, data modeling, medallion architecture, pipelines, data quality, and governance.
- Cloud & Orchestration: Apache Airflow, Azure SQL, Azure, AWS, Snowflake, Docker, on-premises and cloud environments.
- Analytics & BI: Power BI, DAX, Excel, KPI analysis, executive dashboards, P&L, sales, marketing, costs, and operations.
- APIs, Automation & AI: FastAPI, OpenAPI, webhooks, Zapier, n8n, Apps Script, BotConversa, AI agents, and custom GPTs.
- Leadership & Business: Project leadership, technology strategy, technical documentation, requirements gathering, and decision support.

PROFESSIONAL EXPERIENCE

Sinal Business | Head of Technology, Data & Innovation / Data Engineer — 2024 - Present

- Built and leads the holding company's Technology, Data, and Innovation function, supporting real estate, construction, and agribusiness operations.
- Designed and maintains an in-house ecosystem of data products, APIs, automations, CRMs, and AI agents, reducing vendor dependency and recurring costs.
- Develops pipelines with Python, SQL, PySpark, and Airflow, centralizing operational and financial data with traceability, governance, and standardization.
- Creates secure, documented APIs with FastAPI/OpenAPI and integrations for chatbots, CRMs, internal applications, and external providers.

Caucaia Malls | Analytics Engineer — 2024 - Present

- Delivers market intelligence and reporting for shopping centers across sales, marketing, foot traffic, events, audiences, targets, costs, and operations.
- Builds and evolves Power BI dashboards using DAX, SQL, and Python for data preparation, consolidation, and analysis.
- Automates analytical workflows and integrates internal systems, Azure, Google Admin Console, Intranet, and Hikvision/HikConnect solutions.

Sinal Business | Administrative Analyst / BI & Data Analyst — 2023 - 2024

- Converted distributed databases and spreadsheets into strategic dashboards for delinquency, P&L, construction projects, and executive KPIs.
- Standardized metrics and delivered management analyses to support cross-functional business decisions.

Sinal Business | Administrative Assistant / Apprentice — 2021 - 2022

- Supported administrative routines, data organization, operational controls, and internal teams.

SELECTED PROJECTS

Corporate Data Architecture — Airflow, Azure, SQL, Python, governance

Designed an architecture that integrates operational sources through orchestrated pipelines, centralizing data in a secure, scalable environment with standardization and high availability.

WhatsApp Collections + Kanban — BotConversa, Zapier, n8n, CRM, dashboards

Automated customer service and collections through WhatsApp, including invoice reissues, CRM interaction tracking, and analytical dashboard consolidation.

Internal Data API — FastAPI, OpenAPI, security

Developed an API for secure, standardized corporate data sharing, with access control, traceability, and integrations with applications and vendors.

Superlógica + MXM DAG — Python, ETL, Airflow, ERP

Built a monthly ETL that integrates financial receipts from Superlógica into MXM WebManager, automating accounts receivable title imports.

Sales Analytics Dashboard — Power BI, DAX, marketing analytics

Created a management dashboard based on the 4Ps of Marketing, promotion ROI, and comparisons between operating costs, gross sales, and net sales.

Facial Recognition Integration — Intranet, Hikvision, HikConnect

Implemented real-time employee data synchronization between the shopping center Intranet and facial-recognition access-control devices.

PUBLIC PROJECTS

- GitHub: github.com/vitoriape
- AgroSIS: github.com/vitoriape/agro-sis — agricultural ERP prototype with SQL modeling, ER diagram, and UX.
- BI Documentation: github.com/vitoriape/pbi-docmentor
- Superlógica + MXM ETL: github.com/vitoriape/etl-superlogica-mxm

EDUCATION

- Associate Degree in Database Technology — SENAC University Center | Completed in 2023
- Technical Diploma in Logistics — ETP Educational Center | Completed in 2019

CERTIFICATIONS, COURSES & LANGUAGES

- Certified Data Engineer and DBA, with hands-on experience in architecture, pipelines, integration, and technical documentation.
- Preparing for a cloud/data certification, with a focus on AWS Data Engineering.
- Data Engineering on AWS — Foundations; Data Engineering on AWS Learning Plans, including hands-on labs.
- English: C1 Advanced — Cambridge English.
